

Neurological Evaluation

Patient Name: Sarah Miller, 29F

Date of Analysis: 2026-04-05

Clinical Notes

Patient reports persistent migraines and visual auras twice a week.

Neurological Exam

Cranial nerves II-XII intact. Reflexes 2+ symmetrical. No focal motor deficits.

Scan Findings

Brain MRI (without contrast) shows no structural abnormalities or inflammation.

Recommendation

Lifestyle tracking of triggers. Prescription for Sumatriptan for acute episodes.
